

TRIUMPH BOARD Presents Projected Capacitive Technology Solution at InfoComm 2017 in Orlando

Orlando, June 14, 2017 – TRIUMPH BOARD demonstrates new Projected Capacitive Technology – the TRIUMPH BOARD PCT 134” with a full HD ultra-short-throw projector.

TRIUMPH BOARD PCT 134” and full HD ultra-short-throw projector, supports simultaneous 30-point touch input from fingers and pens, and allows using traditional teaching tools with TRIUMPH CLOUD on an ultra-wide PCT and storing the class notes in the cloud just like using a huge tablet to establish a real interactive teaching environment.

TRIUMPH BOARD 134” PCT is an interactive board that allows 30 users to write draw and move objects simultaneously. A user can write and erase with a marker pen.

TRIUMPH BOARD 134” PCT uses Projected Capacitive Touch. All PCT touch screens are made up of a matrix of rows and columns of conductive material, layered on sheets of glass. Unlike resistive touch screens, capacitive screens do not use the pressure of your finger to create a change in the flow of electricity.

Instead, they work with anything that holds an electrical charge – including human skin.

TRIUMPH BOARD 134” PCT uses Roll Type technology which makes the screen virtually unbreakable and gives it the flexibility to be contoured or bent.

Features:

- True multitouch: 30 users can write and control objects simultaneously
- Multi-touch gesture recognition
- Roll Type lets you easily manipulate with the screen and use it on uneven surfaces or corners of the room
- Multipurpose – combines the possibility of controlling applications with many interactive tools using finger, pointer and stylus or even use the board for writing with a traditional dry erase marker
- High quality and durability
- Precise calibration, high speed and easy to mount

- TRIUMPH CLOUD - online annotation software with “myfiles” cloud account and free student accounts
- DisplayNote - collaboration and content sharing software with classroom management (cloud)
- E-share - wireless and easy content sharing software
