

MULTI Touch WR Upgrade Kit Quick Start Guide

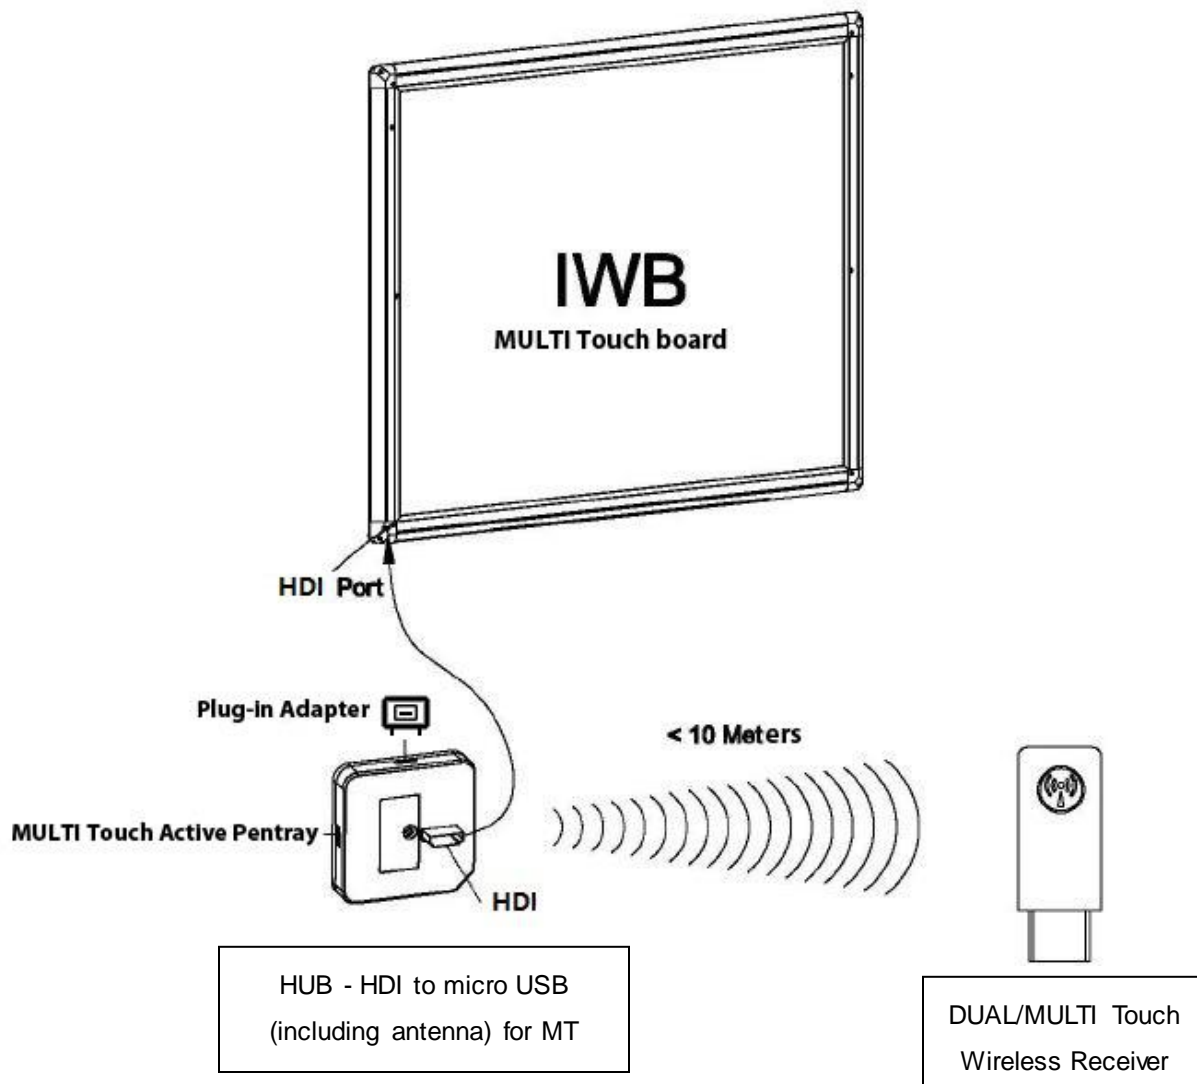

1) Package Contents

8592580091490 TRIUMPH BOARD DUAL/MULTI Touch Wireless Receiver

8592580091759 TRIUMPH BOARD HUB - HDI to micro USB (including antenna) for MT

8592580091476 / 8592580091469 / 8592580091483 TRIUMPH BOARD Plug-in Adapter (EU/US/UK)

2) HW Connection

1. Connect the HUB - HDI to micro USB (including antenna) for MT to the board using the HDI port.
2. Connect the HUB - HDI to micro USB (including antenna) for MT to a power source using the Micro-USB cable. You can connect it with the power adapter or a portable battery. The red & green light will both turn on after the power source is connected.
3. Connect the smart pen tray (optional) with the HUB - HDI to micro USB (including antenna) for MT to mini USB port.
4. Plug in the USB DUAL/MULTI Touch Wireless Receiver to the PC.
5. Pair the board using the TB Comenius MULTI Touch Driver.

3) SW Connection Setup

1. Scan

- Click “Scan” to search for available IWBs.

2. Pair

- Select the IWB Name and click “Pair” to make pairing for the DUAL/MULTI Touch Wireless Receiver and MULTI Touch board.

3. Assign IWB Name

- It is recommended to rename the IWB Name unit after pairing.

4. Select Channel

- 30 wireless channels are available for selection.
- Change the channel when the signal is weak.

5. Unpair

- Click “Unpair” to release the channel lock.
- Click “Unpair” and re-do pairing if the HUB - HDI to micro USB (including antenna) for MT unit or DUAL/MULTI Touch Wireless Receiver has been changed.
