TB Comenius Software – Version 6.0

- 1) Software allows user to run / operate even no hardware connected.
- *Note:* some features will be disabled automatically if no hardware connected with the PC / Laptop
 - 2) TRIUMPH BOARD MULTI Touch enables four users to write and draw simultaneously. Four touch inputs enhances this technology allows four users simultaneously draw, write, move four objects and control (resize, rotate) two objects using two fingers per object in same time.
 - 3) TRIUMPH BOARD MULTI Touch boards includes multi feature. While *two* fingers will be "Selection", "Resize" and "Rotation", five fingers will be "Eraser".
 - 4) Software allows you to annotate your computer desktop. TB Comenius Software and system and the projector connect to your computer. The projector displays your computer desktop onto the whiteboard and the Software detects when you touch the board
 - 5) There are 2 modes available for Software.

a) Windows Mode - allowing user to use finger to control their computer desktop onto the whiteboardb) Whiteboard Mode - useful features for user to prepare presentation / teaching material

To turn to **<u>Windows Mode</u>**, click this "minimize".

6) When writing words, each letter will be grouped automatically in 5 seconds, if user wants to select one of the letters, they need to ungroup to words by clicking icons on the right top corner.

Working area

In the default page layout, there will be 6 different areas. The Drawing zone will be in the middle of the window. The Menu bar and Toolbar on the top contain most of the functions in the software. The Property window will show contents relative to the selection on the Navigation bar, providing different information and settings. The Bottom Tray bar will provide the quick access of page property setting and zooming. You can switch the Toolbar to be placed at the bottom side. The Navigation bar and the Property window can also be switched to the right side too. You can even hide the Toolbar, Navigation bar and Property window by clicking on them in View on Menu bar.

Toolbar

In TB Comenius v6.0 the Toolbar can be fully customized. Some tools are already displayed at the toolbar by default, while some are hidden. The toolbar are separated into 3 parts – Actions, Tools and Property. Simple right click on the Toolbar allows you to customize it. See also page 35.

Actions bar

This area provides the basic functions. It is also able to add the shortcuts of other software in the Actions bar.

Tools bar

Tools bar store all of the useful tools including the Pen tools, Geometry tools, Erasers....

Property bar

The Property on Toolbar varies with different Tools. It provides quick access for changing the pen, line properties, color and other specific modification related to the tool selected.

Navigation Bar

Inserting materials within TB Comenius 6.0

You can insert different materials within the TB Comenius 6.0, enriching your documents full of attractive contents.

Inserting existing multi-media files

You can insert existing Multi-media file into the document using corresponding tools. Click on the Insert in Menu bar and then choose the file you want to insert.

Inserting Image	Inserting flash	Inserting sound

Inserting new multi-media files

You can insert new contents from different sources.

Insert image from Google search

By the help of Google image search on the Navigation bar,

you can immediately get access to the internet and search for

whatever image you want. Just fill "Input Keyword" with requested word and press "Search " button. Double click or

drag the image into the drawing zone to insert the image.

Inserting other contents

There are some other contents which can also be inserted into the document.

Hyperlink

You can add hyperlink to any object. You can link to a webpage, a page in the document or a local file. Click on the Hyperlink tool to pop up the Hyperlink setting page.

Link directly to a specific webpage:

- input website.
- choose launch type.
- click "ok".

2 Page

- Link to a specific page within your document:
 - select the page you want to link
 - select type of launch type
 - click "ok"

3 File

- Link to a specific local file:
 - select file you want to link.
 - choose launch type.
 - click "ok"

4 Attach

Use the Hyperlink that organized in the Hyperlink Manager

Hyperlink manager

You can click on the Navigation bar to enter the page of Hyperlink manager. In Hyperlink manager, you can edit and manage your hyperlink. You can insert a new link into the manager first, and call it out when you are setting the hyperlink of objects. You can also delete links easily in the manager.

Inserting an animate path

You can now insert an animate path to an object. The object will move along the animate path at the end of Playback.

To set the animate path, just right click on the object and select "Set animate path", then click and drag the path. The speed of dragging also affects how fast the object will move. After you create the path, a grey dotted line will appear showing the animate path. You can preview it or even delete it if you want. You can even preview it in View menu – Playback.

Hand writing recognition

In TB Comenius 6.0, you can convert your writing into text format by the Hand writing recognition. Except using the hand-recognizer pen, you can also select the words to be recognized, and click on the Menu icon to choose the word you want.

Note:

For Windows XP, please make sure to install the Handwriting recognition package to support the function.

Turning off the Touch keyboard in Windows

Active Touch keyboard feature in Windows can interfere with MyScript Stylus. We recommend you to deactivate Windows Touch keyboard to use it properly:

- 1. Click on "Start" and choose "Control Panel"
- 2. Search and click on "Tablet PC settings"
- 3. Choose "Other"
- 4. Click on "Go to Input Panel Settings"
- 5. In "Opening" tab uncheck:
- 6. For tablet pen input, show the icon next to the text box
- 7. Use the Input Panel tab
- 8. Click OK

Turning off the Flicks function in Windows

Active Flicks feature in Windows can interfere with MyScript Stylus. To disable this feature, use the following procedure: Start button-> Control Panel - > Pen and Touch -> Flicks and uncheck "Use flicks to perform common actions quickly and easily."

Editing the object

You can edit all the objects in your documents. Before editing, please select the object first using the Select tool You can select a group by dragging an area or selecting an object by clicking on it.

lcon	Description	Icon	Description
8	Cut		Image Editor
A	Line and Fill property	1	Clone
G	Rotate		Hyperlink
The second se	Menu list	5	Adjusting size

After selecting the object, you can do some basic editing immediately, e.g. resize, rotate or moving the objects.

You can also use a gesture.

If you click on the Menu list, you can find the "90 degree rotation" and "flipping". Also "show/hide angle" will be found on Triangle and Parallelogram. You can enable/disable and angle so angle will be no longer shown on the object.

Cut, Copy and Paste are common and useful tools for editing the images. When you cut an object, the image will disappear and saved in the memory. Unlike the Cut, Copy will save the object without deleting it. You can paste the object to the document once you cut it or copy it. Clone is a new function in v6.0, which allows you to copy and paste an object immediately once you click the tool.

Adjusting the Order

You can adjust the order to show the effect of different layers. You can click on the Menu list and change it in the sub-menu "Order".

TRIUMPH BOARD® One Idea Ahead

You can adjust the Line property and the Fill property from the Navigation bar. This window will provide more setting than the fill tool or line tool – change the line thickness, color, style... or you can even set transparency of object.

Fill property

Image editor

Image can be edited with more setting in the Image editor.

When you select a specific image, click on the Image editor, the editing window will pop up. You can adjust the brightness, crop or erase part of the image. Press "ok" to confirm.

Erasing the Object

In TB Comenius 6.0, there are 2 types of erasers. They are the Normal erasers and the Area eraser.

The area eraser *A* can erase all of the things by selecting a specific area on the drawing zone.

Besides you can drag the object into the trash bin 🐻 to delete it.

You can also select the object you want to erase and use the Delete function 😢 .

Clear page 😧 can be used if you want to delete all the contents on the page.

View and page setting

Page View

There are different kinds of viewing styles:

Zooming

The Bottom Tray bar provides quick access of the zooming function. Adjust the zoom with \bigcirc / \bigcirc and resume to a normal view by the zoom reset G.

Page setting

Page list

The Page list in the Navigation bar shows all the pages you created in the document. You can edit the pages here e.g. copy and paste pages, switch the page order, and change the name of the page.... clicking on *sicon*.

New page property

You can select the New page property at the Bottom Tray bar, or in the quick menu of page list.

By default, the new pages will be set as the same resolution as your computer setting. You can change it to A4 size or to 4:3 / 16:9 / 16:10 ratio. The setting is valid from a new page.

Rotate the document

Besides the ratio and sizes of the document, you can also rotate the page 90 degree clockwise and anticlockwise at the Bottom Tray bar or simply right click on the drawing zone and click on "Rotate Clockwise" or "Rotate Anti-clockwise".

Background color

You can set up the background color of the page.

Right click on the drawing zone and select the "Background color".

You can fill with Single color, Gradient color or even with a chosen image file by clicking on "Image Path".

	Background Color	×
Type Single Color	Gradient Color	
First Color		
Image Path:	Reset

File management

Save

You can save the file after your editing. The software has an auto save function which prevents you losing your file accidently. You can find the Auto save setting at "File – Auto-Saving Settings" in the Menu bar. The "Save and Send Mail" can allow you to save a file and send it using email immediately.

Save as template

You can save a page as a template, so that you can load the file immediately at "My Template" in the Library.

Open

You can open previous edited file by "Open". The "Recent file" provides the quick access of the last 5 edited files so you can click on those files and open it easily.

Import and Export

TB Comenius v6.0 software supports most of the file formats, including the most popular "iwb" format which is a universal file format for interactive whiteboards. You can open those files using the "Import" function. Besides, it supports following file extensions: *.doc, *.docx, *.pptx, *.xls, *.ppt, *.pdf, *.notebook.

If you want to save the file into other format, you can use the "Export" function.

It supports following file extensions: *.pdf, *.doc, *.iwb, *.tiff, *.html, *.svg, *.jpg, *.bmp, *.png, *.avi, *wmv, *.mpeg, *.swf.

Settings

On the Setting menu in the Menu bar, you can set the following items in the software.

Change language

You can change the language of the software. There are 26 available languages.

Hand-writing language

You can change the language of the Hand-Writing Recognizer here. It depends on OS Windows's settings.

Calibration Hotkeys (require Hotkeys strips)

You need to calibrate the hotkey if you want to use them. Follow the steps on the screen to complete the calibration.

20 hotkey features is available for user to setup.

- Click on Setting in Main program menu and choose Calibration Hotkeys
- 2) Use finger or stylus to point Hotkey strip icons according to red target.

Note: You can change a Hotkey Size in menu Settings – Option. You can select 2x2 for small Hotkey Strip or 5x5cm for big Hotkey Strip. See also next page.

Select User Profile

You can save the Toolbar setting for various users under "Select User Profile" so you can switch between them quickly.

Toolbar setting & Lite version Toolbar setting

You can set up both the Lite and Full version Toolbar here.

For Toolbar setting you can also use right-click on Toolbar shows a Customize Toolbar window:

You can simply drag and past a tool you want to add into the Action or Tools menu bar.

You can also add you own shortcuts, clicking on "Other" and then "Add..." You can add an *.exe file extension for third-party programs.

For Lite Toolbar a following Window will appear:

You can simply drag and past any tools you want from right window and to add them into the Lite Toolbar. You can also add you own shortcuts, clicking on "Other" and then "Add…" You can add an *.exe file extension for third-party programs.

Option

In Option, you can toggle on/off some of the functions in the software.

You can enable hotkeys if you want to use them. You can set the position of hotkey strip and the correct button size.

You can also enable/disable the Smart gesture.

Please contact your local supplier for the warranty and technical service or find all warranty conditions and service partners on our website <u>www.triumphboard.com</u>. For any questions please email us to <u>info@triumphboard.com</u>
