

Mobile Stand with Easy Lift System

* Picture is for illustration only; whiteboard and projector are not included

The TRIUMPH BOARD Mobile Stand with Easy Lift System has a pneumatic lifting system for adjusting the height over a range of 48 cm. The lift system also includes a projector arm with a grip to make it easier to center the projector image on the board. The arm is designed for use with projectors with an ultra-short projecting distance* and moves in conjunction with the board.

The TRIUMPH BOARD Mobile Stand with Easy Lift System has a white steel construction with plastic ends. The lifting system has pneumatic springs so there is no need for a counterweight and the stand only weighs 11 kg.

The Easy Lift on the mobile Stand can be set during assembly to one of three basic positions according to the height desired by users. In addition, it has wheels for easier movement but these can be easily blocked to increase stability and prevent the Stand moving.

The TRIUMPH BOARD Mobile Stand with Easy Lift System is designed to provide the greatest convenience and quiet and smooth movement throughout its lifespan. We recommend using the Stand with the TRIUMPH BOARD PROJECTOR PJ2000/PJ2000i, PJ3000/PJ3000i.

Features

- Quiet operating and easy handling
- Height of the lower board edge adjustable during assembly
- No maintenance required
- Components resistant to long-term wear
- Professional steel construction
- Elegant modern design
- Simple assembly
- Low weight

Specification
