

TRIUMPH BOARD Products use **e3 environmental ceramic steel surface** which is the first and only ecologically intelligent whiteboard surface to receive Cradle to Cradle certification.

e3 environmental ceramic steel surface has achieved the following key environmental milestones:

- Total amount of heavy metals cadmium, mercury, hexavalent chromium, and lead less than 0.1%
- All coatings are free from arsenic and antimony
- No Volatile Organic Compounds (VOCs)
- Steel core made from minimum 30% post-consumer and post-industrial waste
- 99% recyclable
- Cradle to Cradle Silver Certification *

* Cradle to Cradle certification focuses on the characteristics of sustainable materials, products, and systems. The certification process places a major emphasis on the human and ecological health impacts of a product's ingredients, as well as on the ability of that product to be truly recycled or safely composted. The quality of energy used to create a product, water quantity and quality, and social responsibility also are essential sustainability characteristics and focus areas in this certification process.

All of TRIUMPH BOARD® ceramic steel surfaces provide the following advantages:

- 30 Warranty
- Outstanding durability
- Superior visibility
- Exceptionally smooth writing and erasing
- Resistance to chemicals, fire, stains, bacteria, scratches, and graffiti
